DYNEEMA (SK75)

DYNAMICA rope is the most compact dyneema® rope in the world. It has a unique coating that ensures shape stability and increased abrasion resistance for longer working life. The rope is heat set under tension to ensure maximum strength, durability and uniformity. Length, Polyester/PE Cover, traditional splicing and protection of the eyes with fire hose material to customer requirement. **Sizes:** 4mm to 12mm ex stock, 14mm to 44mm 2 to 4 week delivery, sizes over 44mm also available on request P.O.A.

Uses: Offshore, fisheries, lifting, mooring and towing.

Advantages of Dynamica

***High breaking Strength:** Stronger than steel wire rope of the same size.

***Light:** 1/16th the weight of steel wire therefore easier to handle.

***Compact:** Passed through patented "heat setting process" which means Dynamica is more compact and has higher break strength in its category.

***Safety:** Stretches very little, stores little energy which means no lashbacks in the unlikely event of breaking.

***Long Life:** UV stabilisation gives the rope long and safe working life. Not affected by oil or water and just as strong in wet, dry and humid conditions.

***Easily Recoverable:** Floats in water therefore easy to recover.

***Balanced and easily spliceable:** 12 strand construction hence well balanced and easy to splice.

Code	Size	Colour	Weight / 100m	*B/S (Avg)
DY0412S	4mm	Blue 12 Strand	0.67kg	1.3t
